

Medical Dissertation

Clinical Research

What topics is our research working on?

We do science in the field of clinical research within internal medicine and cardiology with focus on:

- Rapid diagnosis of **acute myocardial infarction**
- Rapid diagnosis of patients presenting with **syncope**
- Diagnosis of **stable coronary artery disease**
- Therapy of **acute heart failure**
- **Perioperative myocardial infarctions**

Why join us?

We are a **young** and motivated team offering:

- High **involvement** into clinical research and **excellent teamwork** within 8–12 months of clinical research
- **Participation** at internal and clinical courses as well as team activities or scientific seminars
- Ensured time frame and a **co-authorship**
- **Obtaining essential skills** for future work in clinical research

Are you the one we are looking for?

Positions open for **medical students** from at least end of Masters course or **physicians** with an interest in clinical research
